

Vaughandale Construction Limited recognises that it has a responsibility to protect the environment through the use of processes, practices, materials or products that avoid, reduce or control environmental damage.

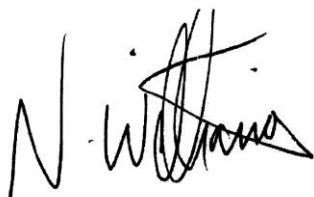

The Company shall:

- Fully comply with all compliance obligations, environmental legislation, regulations, and codes of practice.
- Identify significant impacts to the environment from its activities and take appropriate actions to reduce them.
- Minimise its impact on the environment through the efficient use of energy and raw materials and by minimising waste through re-use and recycling.
- Minimise emissions to air, land, and water.
- Ensure that all its employees are aware of its Environmental Policy and are committed to complying with it.
- Develop sustainable supply chains by using suppliers wherever appropriate that have environmental standards compatible with our own and are localized.
- Regularly audit and review its activities and continually strive to improve its environmental performance.
- Operate a “good neighbour” policy and foster openness and dialogue with local organisations to ensure an active response to their concerns.
- Document environmental objectives within our business plan and regular review meetings

This policy will be formally reviewed at least annually through Management Review Meetings attended by the Managing Director or his nominated representative, to ensure it remains effective, is adequately communicated and meets the business needs of the Company.

The Quality Management System is developed to reflect the above and in compliance with BS EN ISO 14001-2015, additional to other regulations and legislation affecting the Business.
