

Vaughandale Construction Limited recognises its responsibility to protect the environment by implementing processes, practices, materials, and products that prevent, reduce, or control environmental impact.

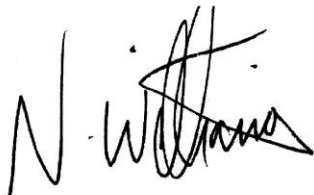

The Company is committed to:

- Fully complying with all environmental legislation, regulations, compliance obligations, and industry codes of practice.
- Identifying significant environmental impacts, including those related to climate change, and taking appropriate action to mitigate them by reducing greenhouse gas emissions, improving energy efficiency, and promoting sustainable resource use.
- Minimising environmental impact through the efficient use of energy and raw materials while reducing waste through re-use and recycling.
- Controlling emissions to air, land, and water to prevent pollution.
- Ensuring all employees are aware of and committed to this Environmental Policy.
- Developing sustainable supply chains by prioritising suppliers with compatible environmental standards and, where possible, sourcing locally.
- Regularly auditing and reviewing environmental performance to drive continuous improvement.
- Operating a "good neighbour" policy by engaging in open dialogue with local organisations and responding to environmental concerns.
- Documenting environmental objectives within the business plan and reviewing them regularly.

This policy will be formally reviewed at least annually during Management Review Meetings, attended by the Managing Director or their nominated representative, to ensure its effectiveness, communication, and alignment with the Company's business needs.

The Quality Management System has been developed in accordance with BS EN ISO 14001:2015 and all other relevant environmental regulations and legislation.
